## UC Region Y2K Readiness Report

| Hardware Y2K Compliance<br>September 1998 | Mini<br>Computer<br>Servers |    |   | PC LAN<br>Servers |    |   | Desktop PCs |    |   | Laptops |    |   | Workstations |    |    |
|-------------------------------------------|-----------------------------|----|---|-------------------|----|---|-------------|----|---|---------|----|---|--------------|----|----|
| Office (includes field offices):          | Yes                         | No | ? | Yes               | No | ? | Yes         | No | ? | Yes     | No | ? | Yes          | No | ?  |
| Albuquerque Area Office                   | X*                          |    |   | X                 |    |   |             |    | X |         |    | X |              |    | X^ |
| Farmington Construction Office            | n/a                         |    |   | X                 |    |   | X           |    |   | X       |    |   | n/a          |    |    |
| Provo Area Office                         | X*                          |    |   | X                 |    |   |             |    | X |         |    | X |              |    | X  |
| Power Office                              | X*                          |    |   | X                 |    |   |             |    | X |         |    | X |              |    | X  |
| Regional Office                           | X*                          |    |   | X                 |    |   | x**         |    |   | X       |    |   |              |    | X  |
| Western Colorado Area Office              | X*                          |    |   | X                 |    |   | X           |    |   | X       |    |   |              |    | X  |

\* HP mini-computers will be compliant through out the region when Hewlett Packard makes a software/firmware upgrade available for Y2K compliance. Waiting for Y2K software/firmware upgrade for Dgs that won't create problems like the last patch (MU05 tape) did.

\*\* All are compliant in the Regional Office except for a few old PCs. This is also the case with the field offices who have responded to the PC information request.

^ The Solaris operating system must be at version 6.2 on the Sun Workstations for Y2K compliance.

All of our major commercial software applications and BOR-wide applications are Y2K compliant. If you would like to check commercial applications that are unique to your office. Please check the following BOR Y2K web site for an extensive list: [WWW.USBR.GOV/Y2K/INVENTOR/COTS\\_DX.HTM](http://WWW.USBR.GOV/Y2K/INVENTOR/COTS_DX.HTM) Click on the letter of the alphabet that is the first letter of you application name. The tracking list below includes those applications that are primarily unique to UC Region and need to be made Y2K compliant.

| <b>DOS</b>                                      | <b>Version 6.22</b>                                                |

#### **COMMUNICATIONS:**

**Communications equipment has been surveyed through out the UC Region. It has not been tested for Y2K compliance yet. The testing is planned for November.**
